►ALBERTA OIL AND GAS EQUIPMENT MANUFACTURERS AND EXPORTERS INDEX 1987

Message from the Minister

I am pleased to introduce the 1987 Alberta Oil and Gas Equipment Manufacturers and Exporters Index, a complete reference guide to more than 500 companies that have forged a global reputation for leading-edge developments in oil and gas.

Alberta is proud of its history as a pioneer in this exciting field. Indeed, some of the most sophisticated technologies in drilling, recovery techniques and engineering services were developed here in our resource rich province.

Performing in tough terrain and extreme climates, Alberta equipment is exported to over 50 countries for use in exploration, drilling, servicing and production of oil and gas.

This index provides an overview of the products produced in Alberta by leading manufacturers of gas and oilfield equipment. Further information can be obtained by directly contacting any of the companies listed herein.

Yours truly,

Larry R. Shaben,
Minister

►ALBERTA OIL AND GASFIELD EQUIPMENT MANUFACTURERS INDEX 1987

►TABLE OF CONTENTS

How to use this index 1

Section 1: Alberta Made Products
Product Name Index 3
Manufacturers by Product Name 9

Section 2: Alberta Equipment Manufacturers
Company Name Index 83
Company Descriptions 97

►HOW TO USE THE INDEX

This index is separated into two sections: Section 1, organized by product category, and Section 2, organized by company name.

In Section 1, the names of specific oil and gasfield products are arranged alphabetically and within each product category, the respective manufacturers are listed alphabetically. This information is preceded by an index containing each product name and the corresponding page number.

In Section 2, the Alberta oil and gasfield equipment manufacturers are listed alphabetically along with a description of the products manufactured. This information is preceded by an index containing the company name and the corresponding page number.

If you are looking for a specific product and do not know a company name, or if you want to know all of the companies which are indexed in the Index as manufacturing that product, then refer to Section 1.

If you are looking for information describing a specific company, refer to Section 2. The company descriptions indicate if a manufacturer exports, with a * preceding the name, and provide their address, phone number(s), telex and a description of the products manufactured.

If you wish to scan the product categories included, refer to the Product Name Index. Similarly, the Company Name Index may be referenced for quickly identifying the companies included.
